R&D DEPARTMENT

1994

2026

From first sketch to finished sample, our R&D team works entirely in-house designers, pattern makers, and photographers under one roof. Every style is developed, sampled, and documented on-site before it ever reaches production, so what you approve is exactly what you receive.

SUSTAINABLE ACTIVITIES

ENVIRONMENT & ENERGY

We are committed to reducing our environmental footprint through sustainable, low-cost energy solutions and resource conservation:

- Energy Efficiency: Implemented LED lighting, solar power, and servo-motor production machinery to lower electricity consumption.
- Thermal Optimization: Installed an economizer to maximize energy efficiency and reduce gas usage.
- Water Conservation: Reusing treated ETP water where feasible to minimize freshwater reliance and conserve natural resources.

CONSUMPTION

Design for entire life cycle by ensuring sustainable consumption and production patterns.

EDUCATION

Ensure inclusive and equitable quality on the job education and training to promote learning opportunities for all.

CERTIFICATIONS

Every certification we hold is independently audited, not self-declared, from social compliance to material traceability.

Our program spans four areas ethical labor, sustainability performance, material sourcing, and quality management giving partners one transparent reference point for due diligence.
